

Let the free market reign. XM provides a valuable service, that can impact safety and even the environment, by letting people know, on a real time basis (not once every ten minutes) where significant traffic events are occurring, and thus allowing people to avoid the impacted areas.

This can help firefighters, ambulance crews and the police to better respond to any incidents, and can have people spending less gas by not sitting in traffic.

Please do not succumb to lobbyist's checks, and please do the will of the people. Can you imagine even one constituent (other than those that would work for the other broadcasters) actually wanting to limit choices in the marketplace? Do the right thing, and allow XM to continue to provide this valuable service.
